Instruction manual

1.Insert the transmitter plug port into the corresponding USB port of the computer host or game console. When used for the first time, a new hardware device will appear on the computer and enter the recognition state. (If the computer is required to be restarted, please follow the prompts.) The indicator light enters a flashing state and waits to be connected to the headset.

2.2.Press and hold the power button for 3 seconds. At this time, the status light flashes in the waiting-to-connect state. When the status light turns on constantly (Note: green light represents 2.4G mode, and blue light represents Bluetooth mode), it means that the connection is successful and corresponding operations of the headset can be performed. Double-click the multifunction key to switch modes. Open Bluetooth on the mobile phone and search (search name: BE-X1), and click the name to pair and connect. After successful connection, corresponding operations of the headset can be performed.

3.Open the audio player and select your favorite song. Now you can happily enjoy the beautiful and pleasant music brought by this headset.

4.When you feel that the sound is not suitable for you during use, you can also achieve a softer sound by adjusting the volume on the computer or adjusting the volume on the computer or adjusting the volume and sound level on the headset.

5.If you are using a certain voice software, you can also talk to the other party through this headset. The sound of your speech will be clearly transmitted to the other party through the microphone transmission port.

6.When you don't need microphone call, you can click the multifunction key to turn on or off the microphone call (default is on).

7.When you want to switch freely between your mobile phone and computer, you can double-click the multifunction switch key to switch between the mobile phone and computer end (your mobile phone and computer need to be connected to the headset at the same time).

8.When the headset prompts low battery, please charge it through the attached charging cable. When charging, the charging indicator light is red, and the light goes out when fully charged.
